Standard Organization of Nigeria

Certified for Compliance. Built for Trust.

Miri devices are certified by the Standards Organisation of Nigeria (SON), affirming that our air quality and environmental monitoring systems meet nationally approved safety, quality, and performance standards.

This certification reinforces our commitment to delivering reliable, regulation-compliant environmental intelligence solutions across Nigeria.

What SON Certification Means

SON certification confirms that a product complies with the Nigerian Industrial Standards (NIS) for safety, quality assurance, and technical performance.

For Miri users, this means:

- Verified product safety and durability
- Compliance with Nigerian regulatory requirements
- Approved for deployment across public and private sectors
- Trusted for government, institutional, and enterprise use

Our certification demonstrates that Miri devices are manufactured, tested, and validated in accordance with nationally recognized standards.

Our Certification Details

Certification Number: **SON/PI/EE/2719**
Issuing Authority: **Standards Organisation of Nigeria**
Product Category: **Environmental & Air Quality Monitoring Systems**
